PROJECTS AND EXPERIENCE

Library Student System - 2019-2020

- Helped maintain and advance my school's library check-in system. Worked with faculty and students to address and solve problems arising in the program. Used Excell to debug and implement new features, as well as reading feedback from driver software.

Robotics Team AI Developer - 2019-2020

- Worked alongside a partner to develop a program in order to guide a robot to complete tasks such as lifting and driving. Also helped develop a program to allow for autonomous driving and control within a competition ruleset. The program was written using C and C++.

Personal Website - 2021

- Created a website to showcase various personal projects. Built with readability and user experience in mind. Constructed using HTML and CSS.
